

## System Developer - Unity Technologies

A position as System Developer is now open at Unity Technologies.

In this role you will be tasked with building and expanding both the company's internal and external IT structure, maintaining existing systems and providing a stable infrastructure for our rapid growing company.

### Duties & Responsibilities:

- Maintain existing systems
- Maintain and extend a backend infrastructure mainly written in Perl and running on Linux servers connecting systems across geographies. The backend infrastructure interacts with the Unity application it self and/or internal and external web frontend implementations.
- Plan and design the future IT structure of a rapidly growing company.
- Development of new IT systems to help both our development department- and the sales team.
- Internal support.

### Skills & Experience:

- Extensive experience with SQL, Perl, Linux and open source systems.
- Experience with developing web applications as well as solid experience in developing database applications.
- Good planning skills and the ability to keep the goal in sight, even when things get hectic.
- Fluent in English
- Ability to work in an environment where flexibility and solution focus is highly regarded.

### Location:

This position is based in the Copenhagen office

**About the Engine:** Unity is a flexible 3D development application that combines usability and raw engineering power. As a company, we are focused on evolving this technology, constantly driving it forwards and upwards. We aggressively reinvest in development to keep Unity moving and growing at a radical pace, expanding usability, power, and platform reach.

**About the Company:** Unity Technologies offers a highly technical and product driven work environment, where exceptional people from all over the world are entrusted to find smart solutions for difficult problems. We embrace the concept of meritocracy, which means you can expect competitive salary (including stock options) appropriate to qualifications, hard work and brilliance. This is a rare opportunity to become part of a sparkling team of individuals, who each bring passion and excellence to their work.
